New GE T5 HO covRguard® Fluorescent Lamps Offer Exceptional Performance and Versatility, Combined With Superior Shatter Protection – All From the Industry Leader

Food and Customer Security
GE’s 10 mil thick FEP covRguard® shield offers outstanding shatter resistance that helps contain glass fragments and phosphors if a lamp is broken, protecting your food, your customers, and your business’ reputation. All CVG lamps meet FDA, USDA, and OSHA guidelines as well as being NSF certified for use in food service areas.

T5 High Output:
Reduce energy cost by up to $132.00 per fixture. A 4-lamp 54 watt T-5 system with covRguard® can replace a 250-watt HPS system for significant energy savings and even more light. Ideally suited for indirect luminaires and uplighting or as replacement for HID fixtures in warehouse or high bay applications.

Designed for T5 High Output:
Starcoat® T5 HO covRguard® lamps were designed to meet the rigorous demand of high temperature T5 HO operation. The exclusive GE covRguard® shield is designed not to crack, peel, or become brittle over the life of the T5 HO lamp and can withstand temperatures up to 300°F. You can rest assured that the T5 HO CVG lamps will keep your operation clean, bright and protected over it’s rated life.

Environmental Considerations:
All-new GE covRguard® Ecolux® T5 lamps comply with U.S. EPA guidelines and meet all TCLP-compliance regulations. The GE covRguard® Shield is also easily removable for quick recycling. Check with your state for additional disposal guidelines.

Full Line of Lamps Available
GE’s extensive line of CVG lamps includes a wide variety of quality lighting products including CVG T8 ECOLUX® as well as the just introduced T8 and T12 Mod-U-Line® family of CVG lamps.
