

Whatever degree of control you need, Current has an upgradeable wireless solution that's right for you. Our three levels of Daintree Wireless Controls deliver money saving solutions designed for your budget and long-term goals. Explore the exciting world of Daintree and just imagine the efficiencies you can achieve.

### Standalone Lighting Controls

- Simple
- Cost-Effective
- Upgradable
- Wireless

Daintree **One** is a standalone or single fixture wireless control system. Daintree **One** comes with factory installed embedded wireless Occupancy and Daylight sensors that control each fixture individually. It's perfectly designed for applications that require minimal lighting control like closets, storage rooms, and restrooms. Daintree **One** has the ability to wirelessly upgrade to Daintree **EZ Connect** or Daintree **Enterprise** solution.

### Distributed Lighting Controls

- Networked
- Simple Commissioning
- Upgradable
- Wireless

Daintree **EZ Connect** is a distributed room-based lighting controls solution. Daintree **EZ Connect** wireless solution allows a group of adjacent fixtures to communicate with each other directly, without the need for a separate gateway/cloud operating system. Each fixture has an embedded wireless Occupancy and Daylight sensor; the system can be set-up, commissioned and controlled via a simple mobile app. **EZ Connect** is code compliant, easy to install, and is ideal for commercial buildings, hospitals and schools. Daintree **EZ Connect** is upgradeable to a Daintree **Enterprise** system.

### Centralized Lighting Controls

- Code Compliant
- Open at the Top
- Multi-Site Energy Management
- Wireless

Daintree **Enterprise** controls are the foundation of a building's digital infrastructure seamlessly interoperating with a growing ecosystem of ZigBee partner sensor and lighting products and systems. Its network architecture ensures a scalable, secure, and easy to deploy solution for building the digital infrastructure of the future. It is the industry's most intelligent, comprehensive, cost-effective, monitoring, and optimization software for facility, operations, energy, and sustainability professionals. Daintree **Enterprise** is "open at the top", providing an open API to build software apps that enable numerous productivity solutions.
