

Color without compromise

Now retail and commercial lighting designers don't have to choose between optimal color rendering and outstanding energy efficiency. **reveal® TriGain™** technology from Current, powered by GE, is perfect for bringing out the beauty of merchandising, fabrics, architectural details and objects. With 90 CRI, an R9 greater than 90 and 168LPW (lumens per watt), ultimate color quality and minimal energy usage come together in a complete line of **Lumination™ LED fixtures**.

With **reveal® TriGain™**, colors and patterns appear more vivid, allowing for creation of sharper, clearer and more comfortably illuminated environments.

The **Lumination™ LED fixtures** come in a variety of sleek designs,

adding to the beauty of your ceiling landscape while

providing precision-engineered light placement and long-term performance. It's all the best of money-saving LED technology and a sophisticated design aesthetic.

Why settle for anything less? With **reveal® TriGain™** technology, you get color without compromise.
